November 17, 1989

John Kollak

Dear Mr. Kollak:

The United States Environmental Protection Agency (USEPA) has requested that staff in the Environmental Toxicology Program of this Department review the analytical results of a water sample taken from your supply, and comment on the potential health effects posed by continued consumption of this water.

The results of the USEPA analyses for both organic and inorganic parameters indicated no occurrence of any compounds at levels exceeding current health standards or guidelines. On the basis of these tests, we see no reason to alter the pattern of use of the water from this well.

Please feel free to contact me if questions remain or further information is required

Sincerely,

Bruce C. Barrow, MA
Environmental Toxicology Program
